Herein is a threefold lesson, -a lesson of and inspiration to the loyal men of the South.

If just, it would nullify the right of national self-preservation, and make treason a political franchise.

We answer our correspondent's second interrogatory also in the negative. The canvassing of the state in the interest of a conspiracy against the government is not less criminal and may be more injarious than the mere advocacy of the conspiracy on the stamp. Both and Nashville Railroad, but he changed his er save that which protects the Constitation alike are offsuces against the penco and principles by entering into an agreement with from infringement and the Government from dignity and safety of the Commonwealth and his uncle to trade as partners in contraband treasonable attacks. It mest not be supposed that in these resurance of the General Assembly in Sepione" We remember this, and would have overybody else amongst us remember it. The policy thus prescribed by the Legislature is a political opinions." When, however, the "political opinions" of a "citizen" break oat into acts of palpahle and dangerous offence against the laws and well-being of the nation, the ease becomes entirely different, and should be treated accordingly. It is to such cases alone Boston, Nelson county, ran off with the same that onr remarks apply. And even here we raid, and we understand has been a surgeon would have the authorities act with as much | ia the Confederate army, was at the battle of well as jastice.

But we would have them act, and act with thoroughness. The government out of tenderness to the citizen must not provo false to itself, for in losing the government the citizen would lose everything. In this, as in most horhood of Garnettsville, Meade conety, from other things, the golden medium is hard to that and Hardin county, who joined the Constrike; but in this again, as likewise in most | federate army at Bowling Green and remained other things, there is nothing left hut to aim at the true mark with honest motives and a reso. KENTUCKY HARVESTER

COMBINED REAPER AND MOWER

THE GREAT AND CROWNING IMPROVEMENT TO OUR HARVESTER FOR 1862 WHILE REGIVING two distinct speeds or motions to the sickle, a slower motion for it aping, end an increased by it in for moving. This improvement is as editive firsted by simply a change of inform, working in the site or best. But his improvement we entirely amount the great difficulty hereforce found in all Combined Muchines having but one speed, which is too rapid for reaging and too slove for moving, causing unnecessary wear and year of the Machines mells as increased draft. The last is proven us, with those herefore added (by which independently of the knife or sloke is entirely avoided), make this Machine the very perfection of a combination, doing perfectly the work of two Michines. THE KENTUCKY BROAD GAUGE REAPER

THIS Machine is only intended for Resping, and was introduced by us in 1990, and is a complete succes. The fluger-bar and angle-bar are made of wronght from. It is designed for the near of very large grain gos ers, and is capable of cutting from 15 to 2) acres of any kind of grain per day with each. This Resper will cut 26 inches high, and has all led modern improvement, such as resisue or havening the cutters in the owns them in and out of gear when in met.oo. I Nofferlog the KENTUCKY CLIPPER, improved for 1663, we are confident that all the requiriles for a per Mowing Machine will be found in it. It is cheap, light r in wright and draft, than any other yet made; effect simple in construction, and durable. Among the points of excellence in this machine may be commerciated: First—It has two independent divings wheels, both drivers (ret with but one side of coar). The wheels are each coupled to the shaft by a pawl and ratchet, so that in backing the maching is cut of gear, yet when moving I wand nav be thrown in or out of gear at pleasure.

Second—The cutter-bar is founded or hinged, so es readily is adjust likely to uneven surfaces, and is easily raised by means of a lever, to passe over obstructions, it may also be unded and tolded over in reer of the frame. It is need in the best rait steel, thin, intrigid and strong. The fingers are all made of urought won, and the cutting

We have already published their eames. Cap. Blood's visit to Owen, Trimble, at d Henry counties have been productive of much good, and we coefidently expect even more salntary results from his presence in the enat of rebeldom in Kentucky.

We can conceive nothing more heautiful in another column for a meeting of those who leads to the contemplation than the call which we publish in another column for a meeting of those who leads to the candor of the Geearal Assembly whether to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads to the candor of the Geearal Assembly whether leads the candor of the Geearal Assembly w to the candor of the Geearal Assembly whether one who has stirred up a disgraceful strifs with his brothren and appealed to the tribunal of public onition through the press, now when his assault is seccessfully repelled before the tribunal of his own choosing, has any claim to an appeal, in this

The uedersigned therefore solemely remonstrates against acy actice of this Assembly in the premises which may add to the demogral ready done to religion, by disturbing this Court and the Church with a disgraphy prepared unergone. and the Church with a disgraceful personel quer-rel except under the restrictions of jedicial trial according to the forms of the constitution. After some business of little comparative Dr. Scott, from the Committee on the Board of Education, reported a series of resolutions, to wit —Approving the wisdom acd efficiency of its management during a year of great trial; thanking God for his blessing bestownd upon the work; deploring the failure of so many of the Churches for the mieistry, and to seek out such as are really worthy and may stand in need of aid; that the amounts of annual appropriations to indi-vidual beeofic aries it is inexpadient to diminish ootwithstanding the necessity of retrenchment in exponditures; rejuicing in the measure of success afforded Academies and Colleges connected with Wm. The resolation on that subject declares the lnexpediency of decieive action at the present time, and rafers the matter to the next General Assembly, with the assurance that some step will be taken favorable to that end. It was moved by the Rev. Mr. Christism, of Philadelphia, to strike out the 'assurance of favorable action," &c. Some discussion took place on this motion. It was thought by some that the union could not be harmonious, and by others, that the doctrines of the two Schools were in some respects incompatible.
